

HAIKU poems

Like a galaxy
Straight to gravity danger
Right in front of you

Like Jupiter flies
Slow like a meteorit
Easy to universe

Uranus flies fast
But sun never moves from place
Only moon stars shine light

Milky way flies fast
But never shines right in light
Only stars can shine light

Created by **Austėja Venciūtė** from Class 8 B

Big space telescope
Look at our activities
On the sandy beach

Created by **Arijus Dambrauskas** from Class 8 B

Space might be endless
And yet on our earth
We're being wreckless.

Created by **Domas Neverauskas** from Class 9 A

When we see the clouds
It's hard to know what's behind
Big infinite space

Created by **Emilija Sviderskytė** from Class 9 A

Space is wonderful

There are a lot of planets

That's why we live here.

Space is beautiful

There are a lot of big stars

We love watching them.

Created by **Ieva Šitkauskaitė** from Class 8 B

Space is filled with stars

The earth is filled with people

This world needs our help.

Where do you come from?

Borders on Earth fall away

As we fly upwards.

Being fully here

Not denied, invisible

Holding space above.

They remind me of

Not fearing the space above

And beyond my back.
